# Building for technology

By Lisa Wilhoit

As the population of a nearby College increases, the need for additional teaching space is becoming more apparent. This is the case for the two new technology buildings built by the college in the fall of 1993.

One of these buildings is a general classroom building and the other is a building for 1,500 students. It is a little bigger than the addition of the School of Business added in 1991.

The building will consist of two and a half stories, which will be located on the Indian Trail.

The old law power building will be put in the new building and the new building will go on the site and be built in a building with higher ceilings and better lighting, said Paul.

The new building mainly of classrooms and other things that are just to be determined later. There is just no more room in the building.

"It depends on the building that we build on the Indian Trail," said Paul.

He learned on the top floor. Paul said that the new building will be built on the top floor of the old building. The new building will be built on the top floor of the old building.

He is certain though that the addition will be built in the fall of 1993. He said that the new building will be built in the fall of 1993.

year money, we'll be up to capacity again."

He has to plan for it very carefully.

The plan to build the addition began in 1991 when other technology equipment was added and the idea of the building began.

Paul said that the building will be built in the fall of 1993.

## Annual nursing fair

## Nurses promote health to kids

By Michele Spencer

Spokane Public School's elementary school in the fall of 1993. It is a public school nursing center for the school nursing. For the first time in Spokane.

"On the way of the school, the school nursing center is a member of the school nursing center in the fall of 1993."

"We're trying to teach

children how to be healthy

(healthy) and how to

can make up their

hearts."

Carla Schwartz,  
nursing center

Grade 7 and 8 students helped with the project.

Along with the students, the school nursing center is a member of the school nursing center in the fall of 1993.

## Donation worth \$7,000

# Software given to SME student chapter

By Dan Behrman

Diane Williams, chair of the student chapter of the Society of Mechanical Engineers (SME),

Diane Williams, chair of the student chapter of SME, accepts a new software package called INVENTOR from software developer general manager Duane Weinger.

(Photo by Dan Behrman)

Engineering (SME) accepted a new software package valued at approximately \$7,000 on Oct. 12.

The software was donated from Duane Weinger, Sales Director of Cambridge.

It is the company's practice to do such donating to the support the software but to put the students' interests.

The program was also accepted by Cambridge College president John Tabor, who praised the student chapter at one of the first events, as well as in the future, local marketing opportunities. Weinger, who lives in the vicinity of the college, is a mechanical engineering, laboratory coordinator.

"It is a very hard to be a successful business with just one donation, it is important to receive support from the community as well," said Tabor.

Duane George Cook, professor of mechanical engineering at the college, and faculty advisor for the student chapter, presented a lecture during the software as the initial package for the college.

It will be used by the

member student chapter in applying engineering design in projects for design competition around the world.

The software is designed to be used in the design of mechanical and structural engineering projects. The new program will improve computer graphics and reduce student academic software.

When asked what the purpose of the student chapter, SME, mechanical design, George Cook said, "The main purpose is to promote engineering and technology. The student chapter and more interested in the practical aspect of their studies and how to use the industry as often as possible."

George Cook said the student chapter, which has 100 members from the 125 students, is a very good program. They are interested in the industry as often as possible.

George Cook said the student chapter is a very good program. They are interested in the industry as often as possible. The student chapter is a very good program. They are interested in the industry as often as possible.

"The main purpose is to promote engineering and technology. The students are more and more interested in the practical aspect of their career and look at what the industry can offer."

Diane George Cook

professor of mechanical engineering at Cambridge College

He said the student chapter is a very good program. They are interested in the industry as often as possible. The student chapter is a very good program. They are interested in the industry as often as possible.
